

WHAT IS CLAIMED IS:-

1. A printer cartridge for an inkjet printer including:
a printing fluid storage;
a printhead in fluid communication with the printing fluid storage; and
an assembly auxiliary to the printhead arranged to selectively perform a number of different
functions in respect of the printhead.
2. A printer cartridge according to claim 1, wherein the differing functions include at least one of: blotting
the printhead, capping the printhead, acting as a platen in respect of the printhead.
3. A printer cartridge according to claim 2, wherein the assembly auxiliary to the printhead includes a
rotatable member coupled to the printer cartridge adjacent the printhead.
4. A printer cartridge according to claim 3, wherein the rotatable member includes a number of faces each
configured to perform a corresponding one of said differing functions.
5. A printer cartridge according to claim 4, including engagement means fastened to the rotatable member
for engagement by a mechanism of the inkjet printer for selectively bringing the operational faces into
cooperation with the printhead.
6. A printer cartridge according to claim 5 further including biasing means arranged to normally bias a
face of the rotatable member against the printhead.
7. A printer cartridge according to claim 1, wherein the printhead comprises a pagewidth printhead.
